

As a Full-stack Developer with 2 years of commercial experience, I've worked on various SaaS and AI-powered projects, building products from the ground up and integrating modern technologies like React, Redux, TypeScript, NestJS, and OpenAI.

In my previous role, I successfully developed several AI-powered full-stack applications independently, implemented new technologies under tight deadlines, and actively contributed to improving development workflows and product quality. I'm a fast learner, detail-oriented, and always eager to explore new tools that make development smarter and faster.

I'm passionate about creating responsive, interactive, and scalable web applications that deliver real value to users. My strong expertise in React and TypeScript helps me craft dynamic and efficient user interfaces, while my Node.js and NestJS background allows me to design solid, maintainable backend architectures.

SKILLS

- Typescript, JavaScript (ES2015 - 2022)
- React, Redux, Redux-Toolkit, React Native, Next.js
- HTML5, CSS3, Sass (SCSS), BEM, Bootstrap, Bulma, Material UI, Chakra UI, TailwindCSS
- Fetch, REST API, Web sockets, SQL, Socket.io
- Node.js, Express, PostgreSQL, MongoDB, MySQL, Redis, Nest.js, Sequelize, OpenAi, Prisma, Supabase, Clerk
- Unit tests, Jest, TDD/BDD understanding
- Photoshop, Figma
- Git/Github, CI/CD, VS Code, Cursor, Chrome Developer Tools (incl. React), NPM, Webpack, Vite, AWS, Vercel
- Algorithms: Solved 150+ algorithmic tasks
- Basic OOP understanding, basic Python knowledge
- English - Upper-Intermediate

EDUCATION

Odessa Regional Basic Medical College
Junior specialist, Pharmacy
2018 2021

EXPERIENCE

Full-stack Developer, june 2023 - july 2025

SaaS Insiders

Responsibilities:

- Developed and maintained full-stack web applications
- Built new projects from scratch
- Enhanced and supported existing applications
- Implemented new features to existing projects
- Diagnosed and fixed bugs
- Collaborated with cross-functional teams (designers, PMs, QA)
- Worked with APIs and third-party integrations
- Maintained clean, scalable, and reusable codebase

Achievements:

- Developed and launched multiple full-stack web applications from scratch, taking full ownership of architecture, backend, and frontend implementation.
- Integrated OpenAI APIs and other AI tools to enhance product functionality and automate business processes.
- Rapidly learned and adopted new technologies (Nest.js, Puppeteer, Redis, Gemini, APIs integrations) to meet project goals within tight deadlines.
- Collaborated closely with designers and product managers to deliver pixel-perfect, responsive UI using React, MUI, SCSS, and TypeScript.
- Improved backend performance by optimizing database queries (PostgreSQL, MongoDB, MySQL) and reducing API response times.
