

As a full-stack developer with 2 years of commercial experience, I have worked on various projects with different technologies including React, Redux, JavaScript, TypeScript, NestJS and OpenAi .

I have a strong passion for developing highly responsive and interactive web applications, using cutting-edge tools and frameworks. My proficiency in React and TypeScript enables me to create dynamic user interfaces, while my experience with Node.js allows me to design scalable and robust serverside applications.

My previous work experience has given me the experience of working closely in a team, which makes me a good team player, so I am highly interested in collaborating with cross-functional teams to deliver quality software products within agile environments. I am also committed to continuously expanding my skill set and staying up-to-date with the latest trends and advancements in the field, to create innovative solutions that meet projects' needs. I am also ready and interested in learning new technologies.
